“UNITED IN DIVERSITY”

**is the motto of the
European Union.**

**Meeting new people
and new cultures,
bringing people closer
together through
cultural cooperation and
creative activities is at
the heart of all the UE is
doing.**

STUDYING AND TRAINING IN EUROPE

**Your future from a
new perspective**

This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Change your future!

- Are you going to secondary school?
- Are you interested in learning foreign languages?
- Do you like travelling and living abroad?
- Are you interested in technology?

If you have answered yes to all the questions, come to study in one of the many technical high schools in Europe where you can develop a strong vision for your future, learn new technology, develop a globalized outlook, learn how to compete on innovation and face the future with more confidence.

Look ahead!

Studying in Europe offers new perspectives to your education and training: you can either follow a general course of studies and obtain a

secondary school qualification which gives access to University education at first degree level or you can specialise in the technical fields of Electrical Engineering, Electronics, Aeronautical Engineering, Mechanics and Automation, Information Technology, Building Construction and many others.

Learn Unity and Diversity!

Come and discover Europe's mosaic of cultures and institutions in constant interaction. Europe is a continent with many different traditions and languages, but also with shared values. The EU defends these values and fosters cooperation among the peoples of Europe, promoting unity while preserving diversity and ensuring that decisions are taken as close as possible to the citizens.

In the increasingly interdependent world of the 21st century, it will be even more necessary for every European citizen to co-operate with people from other countries in a spirit of curiosity, tolerance and solidarity.
